Frequently Asked Questions (FAQs)

Q1: What is the recommended impedance for the Peavey XR 1200?

A1: The Peavey XR 1200 manual

specifies optimal performance within a specific impedance range. Operating outside this range can lead to overheating, reduced power output, or damage to the amplifier. Always consult the manual's impedance matching section for the specific recommendations depending on your speaker configuration (stereo, bridged mono, etc.).

Q2: How do I know if my Peavey XR 1200 is clipping?

A2: Clipping occurs when the amplifier's output signal is distorted due to exceeding its capacity. The Peavey XR 1200 may have indicator lights (check your manual) that illuminate when clipping occurs. You'll also hear a harsh, distorted sound. Reduce the input gain to eliminate clipping.

Q3: What should I do if the protection circuit activates on my Peavey XR 1200?
